The MAILING DATE of this commu	nication appea	rs on the cover sheet with	the correspondence ac	idress				
THE REPLY FILED <u>13 July 2007</u> FAILS TO PLAC	CE THIS APPLI	CATION IN CONDITION FO	R ALLOWANCE.					
The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:								
) X The period for reply expires <u>03</u> months from the mailing date of the final rejection.							
The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.								
Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).								
Extensions of time may be obtained under 37 CFR 1.13 nave been filed is the date for purposes of determining under 37 CFR 1.17(a) is calculated from: (1) the expirate forth in (b) above, if checked. Any reply received by may reduce any earned patent term adjustment. See 3 NOTICE OF APPEAL.	the period of exte tion date of the sh y the Office later t	ension and the corresponding ar nortened statutory period for rep than three months after the mail	mount of the fee. Continuation Sheet (PTO-303)

Continuation of 3. NOTE: Amendment to claim such as adding limitation of claim 10 into claim 9 changes the scope of the dependent claims (i.e., additional limitation "a service information control ... said tuning device" has been added into amended claims 12-15) and requires further search and/or reconsideration.

In response to Applicant's argument that Kawamura in view of Inoue does not disclose "service information derived from a transport stream" since Kawamura only dealing with control starting from the monitor unit 2 to the tuning unit 1 and not in the other direction from the tuning unit to the monitor unit 2 (pages 9-10), the Examiner respectfully traverses.

Kawamura discloses service information such as program A, program B, or channel information, etc. are transmitted as stream/multiplexed signal from the tuner unit to the monitor unit (see include, but are not limited to, figures 3-5, col. 4, line 53-col. 5, line 5, col. 5, lines 31-55, col. 6, lines 19-57, col. 7, line 35-col. 8, line 34). Thus, Kawamura discloses service information (e.g., program A, program B, channel information, etc.) derived from a transport stream (e.g., multiplexed signal/stream transmitted from tuner unit to monitor unit).
